

Django Developer (3-Month Contract)

Location: London/Hybrid

Compensation: £45K

Length: 3 month Contract which strong possibility of transitioning to full time role

About Pattern Project

Pattern Project offers an AI-driven supply chain and digital twin service for made-to-order garment manufacturing, enabling the fashion industry to move away from mass manufacturing and eliminate the overproduction of 30 billion garments annually. Their service optimises production, reduces waste, and enables more sustainable fashion production. Pattern Project's goal is to abate 10 million tonnes of CO2e annually.

Overview

We are in search of an experienced Django Developer who is skilled in Python and Django and has familiarity with AWS deployment. The ideal candidate will have experience in using HTMX, with JavaScript skills being a strong advantage. This role is key in releasing our first product version and ensuring a smooth customer onboarding experience. Proficiency in Git and experience with CI/CD pipelines are essential for this position. This position has the opportunity for fast growth with the success of the company.

Responsibilities

- Develop and maintain web applications primarily using Django.
- Implement dynamic user interfaces with HTMX, enhancing user experience.
- Efficiently deploy applications on AWS.
- Use Git for version control and collaborate in a team environment using CI/CD practices.
- Identify and resolve software issues, focusing on optimization and quality improvement.
- Write clean, maintainable code and engage in peer code reviews.
- Work both independently and collaboratively within a team setting.

Skills & experience

- Proven track record as a Django developer.
- In-depth knowledge of Python and the Django framework.
- Solid experience with HTMX for interactive web interfaces.
- Familiarity with deploying applications on AWS (EC2, Lambda, Apprunner).
- Strong skills in Git and experience with CI/CD pipelines.
- Problem-solving skills and meticulous attention to detail.
- Capability to work independently and as part of a team.
- Strong communication and interpersonal skills.
- 2 years industry experience

Preferred Skills

- Experience in a startup environment.
- Familiarity with additional programming languages or frameworks.
- Skills in database design and management.

Additional Benefits

- 10% employer contribution to pension

Contact

Please contact simon@pattern-project.com with your CV and short email covering letter detailing your appropriate experience. Linking to a github repo of a Django you have worked on will be a bonus.
